# SAFEDI

## Unique accuracy in contact tracing without personal data

100 % precision in analysis – 100 % secure privacy – 100 % visibility

SAFEDI records close contacts and analyses chains of infection much more accurate than any smartphone app – without using any personal data, without any misadjustment while using, without any accidental deactivation.

*SAFEDI can be attached to your clothes from the right or the left side as well as from above.*

### All benefits at one glance:

-  Keeps your company operating in case of an infection
-  100 % secure privacy
-  100 % visibility
-  Easy to use
-  Easy to wear
-  Unique quality in data analysis

### SAFEDI for distance warning

SAFEDI is a 15 grams light, coinsized clip that is worn on the upper part of the body, close to the facial area which is particularly susceptible to infections. Should the minimum distance not be maintained, SAFEDI starts emitting visual and optional auditory warning signals and the respective SAFEDI-ID is recorded into a close contact tracing journal until the minimum distance is reestablished again. Thanks to its constant visibility, SAFEDI reminds everyone to keep a safe distance.

## Anonymous Close Contact Tracing Journal

Each SAFEDI is assigned to an anonymous close contact tracing journal, which records all SAFEDI-IDs that have undercut the safe distance in the warning range, without using any personal data. By recording both IDs, the so-called double check, SAFEDI provides world's best contact tracing. The transmission works via Bluetooth by using SAFEDI Synchro Hub or the smartphone app.

## All-round Carefree Package for your company: SAFEDI Synchro Hub

SAFEDI Synchro Hub is a stand alone solution, which serves you as charging station and at the same time synchronizes the SAFEDI IDs into the anonymous close contact retracing journal.

-  No private smartphone needed
-  SAFEDI is always in your company and always charged
-  SAFEDI is always synchronized

## SAFEDI Eventbox:

The SAFEDI Eventbox is the ultimate solution for events and seminars. It enables the connection between a SAFEDI and a ticket or a confirmation of participation via NFC.

-  Ready for use without WLAN
-  Connection with a ticket possible
-  Mobile and versatile

## SAFEDI Portal: Close contact analysis and statistics

By entering a case of infection, the SAFEDI portal lists all close contacts respectively the recorded SAFEDI-ID of the persons concerned. This allows the person of trust to inform them accordingly. Smartphone users receive an additional push notification.

-  Most accurate close contact analysis
-  Anonymous and safe
-  Helpful key figures for optimal use of SAFEDI
